

Ichhadhari Dairy Management API (1.0.0)

Download OpenAPI specification:

[Download](#)

RESTful API for comprehensive dairy management system

api

api_auth_change_password_create

Change user password.

POST /api/auth/change-password/

Body: { "old_password": "OldPass123", "new_password": "NewPass123", "confirm_password": "NewPass123" }

Returns: 200: Password changed successfully 400: Validation error

AUTHORIZATIONS: >

jwtAuth or None

Responses

— 200 No response body

POST

/api/auth/change-password/

api_auth_check_permission_retrieve

Check if user has a specific permission.

GET /api/auth/check-permission/?permission=milk.create

Returns: 200: Permission check result

AUTHORIZATIONS: > *jwtAuth* or None

Responses

— 200 No response body

GET /api/auth/check-permission/

api_auth_login_create

Authenticate user and return JWT tokens.

POST /api/auth/login/

Body: { "username": "johndoe", // or email "password": "SecurePass123" }

Returns: 200: Login successful with tokens 400: Invalid credentials

AUTHORIZATIONS: > *jwtAuth* or None or None

Responses

— 200 No response body

POST /api/auth/login/

api_auth_logout_create

Logout user by blacklisting refresh token.

POST /api/auth/logout/

Body: { "refresh": "refresh_token_string" }

Returns: 200: Logout successful 400: Invalid token

AUTHORIZATIONS: > *jwtAuth* or None

Responses

— 200 No response body

POST /api/auth/logout/

api_auth_me_retrieve

Get or update current user profile.

GET /api/auth/me/ Returns current user data

PATCH /api/auth/me/ Body: { "first_name": "John", "last_name": "Doe", "email": "newemail@example.com", "phone": "+919876543210", "department": "Production" }

Returns: 200: User data 400: Validation error

AUTHORIZATIONS: > *jwtAuth* or None

Responses

— 200 No response body

GET /api/auth/me/

api_auth_me_partial_update

Get or update current user profile.

GET /api/auth/me/ Returns current user data

PATCH /api/auth/me/ Body: { "first_name": "John", "last_name": "Doe", "email": "newemail@example.com", "phone": "+919876543210", "department": "Production" }

Returns: 200: User data 400: Validation error

AUTHORIZATIONS: > *jwtAuth* or None

Responses

— 200 No response body

PATCH /api/auth/me/

api_auth_register_create

Register a new user.

POST /api/auth/register/

Body: { "username": "johndoe", "email": "john@example.com", "password": "SecurePass123", "confirm_password": "SecurePass123", "first_name": "John", "last_name": "Doe", "phone": "+919876543210", "role": "viewer", "department": "Production" }

Returns: 201: User created successfully with tokens 400: Validation error

AUTHORIZATIONS: > *jwtAuth* or None or None

Responses

— 200 No response body

POST /api/auth/register/

api_auth_token_create

Takes a set of user credentials and returns an access and refresh JSON web token pair to prove the authentication of those credentials.

AUTHORIZATIONS: > None

REQUEST BODY SCHEMA: application/json required

username required	string non-empty
password required	string non-empty

Responses

> 200

POST /api/auth/token/

first_name required	string [1 .. 100] characters First name
last_name required	string [1 .. 100] characters Last name
date_of_birth required	string <date> Date of birth
gender required	string Enum: "male" "female" "other" Gender

- `male` - Male
- `female` - Female
- `other` - Other

└ marital_status
 required

string
Enum: `"single"` `"married"` `"divorced"` `"widowed"`
Marital status

- `single` - Single
- `married` - Married
- `divorced` - Divorced
- `widowed` - Widowed

└ personal_email

string <email> `<= 254 characters`
Personal email address

└ phone
 required

string `[ 1 .. 15 ] characters`
Primary phone number

└ alternate_phone

string `<= 15 characters`
Alternate phone number

└ current_address
 required

string `non-empty`
Current address

└ permanent_address

string
Permanent address

└ city
 required

string `[ 1 .. 100 ] characters`
City

└ state
 required

string `[ 1 .. 100 ] characters`
State

└ pincode
 required

string `[ 1 .. 10 ] characters`
Pincode

└ emergency_contact_name
 required

string `[ 1 .. 200 ] characters`
Emergency contact name

└ emergency_contact_phone
 required

string `[ 1 .. 15 ] characters`
Emergency contact phone

└ emergency_contact_relation
 required

string `[ 1 .. 50 ] characters`
Emergency contact relation

└ date_of_joining
 required

string <date>
Date of joining

└ date_of_leaving

string or null <date>

	Date of leaving
employment_type required	string Enum: "full_time" "part_time" "contract" "temporary" Employment type - full_time - Full Time - part_time - Part Time - contract - Contract - temporary - Temporary
probation_period_months	integer [-2147483648 .. 2147483647] Probation period in months
is_probation_completed	boolean Whether probation is completed
department required	integer Department
designation required	string [1 .. 100] characters Designation
reporting_manager	integer or null Reporting manager
aadhaar_number	string <= 12 characters Aadhaar number
pan_number	string <= 10 characters PAN number
documents	any Employee documents metadata
bank_name	string <= 100 characters Bank name
account_number	string <= 50 characters Bank account number
ifsc_code	string <= 20 characters IFSC code
is_active	boolean Whether employee is active
notes	string Additional notes

api_milk_suppliers_destroy

ViewSet for managing suppliers.

Provides CRUD operations and custom actions for:

- Listing suppliers with filtering and search
- Creating and updating supplier records
- Viewing supplier collections
- Viewing supplier statistics

AUTHORIZATIONS: > *jwtAuth* or None

PATH PARAMETERS

 id	integer
required	A unique integer value identifying this Supplier.

Responses

— 204 No response body

DELETE /api/milk/suppliers/{id}/

api_milk_suppliers_collections_retrieve

Get all collections for a specific supplier.

Query Parameters: - start_date: Filter collections from this date - end_date: Filter collections until this date - limit: Limit number of results (default: 100)

AUTHORIZATIONS: > *jwtAuth* or None

PATH PARAMETERS

→ id	integer
required	A unique integer value identifying this Supplier.

Responses

> 200
